## TELEFAX MESSAGE:

To: DR F J JIMENEZ ATIENZA - 00 34 42332141	Date: 13 February 1997
Attention of:	Our ref: TMM/MW
From: MR T M MURPHY	No. of sheets: 1

Many thanks for your offer to modify the programme which handles the Wire Data Base, it will be far better for us to input the range of wires we use.

We have now been using the computer programme since the latter part of November and, with your help, via the fax machine, have made good progress in becoming familiar with them. It is the clearance programme, together with the Wire Data Base that we will be using most over the next few months, but once the wire rationalisation exercise is complete, then our attention will turn to the other programmes.

There is no doubt the programmes are extensive and very powerful, using them has not been a problem but, because of our mathematical shortcomings, understanding some of the concepts is taking us a little longer to grasp. Nevertheless, even at this stage we can certainly complete the task for which the software was purchased, and then look forward to using the design programmes, by which time another visit by yourself may be the order of the day.

Best regards

T.M. Murphy
